DETAILED ACTION

Allowable Subject Matter

1. Claims 1-22 is allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art does not disclose nor suggest an elongated, crooked shaft having an axis of rotation, the shaft attached to the torque tube such that rotation of the torque tube about the tube's longitudinal axis causes the shaft to rotate about the shaft's axis of rotation, the shaft having a first end spaced from the torque tube and askew at a prescribed angle with respect to the shaft's axis of rotation; and a sting assembly configured to receive an object, the sting assembly rotatably attached to the first end of the shaft, the sting assembly having a third motor assembly configured to rotate the sting assembly about the sting's longitudinal axis; wherein rotation of the sleeve, the shaft and the sting about their corresponding axes combine to provide roll, pitch and yaw positioning of the object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such

submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
